

Md. Akib Ullah *Jafor*

Building payment systems, cloud infrastructure and agri-tech platforms that scale — Python · Django · FastAPI · Vue.js · OpenStack

01 Profile

Senior Software Engineer with **6+ years** building production systems across **FinTech, AgriTech and cloud infrastructure**. Currently architecting **Meghna Cloud**, an OpenStack-based cloud platform for Bangladesh, after leading an engineering team delivering agricultural monitoring tools for Japanese clients. Proven track record designing payment gateways, billing & settlement services and multi-tenant platforms in Python, Django and FastAPI — with a focus on clean architecture, reliability and teams that ship.

02 Experience

Senior Software Engineer PRESENT

JAN 2026 — PRESENT

Meghna Cloud · GenNext Technologies · Dhaka

Cloud infrastructure platform serving developers and enterprises in Bangladesh.

- ◆ Architect and build core platform services for compute, storage and networking on an OpenStack-based stack, exposed through FastAPI services.
- ◆ Design the billing, usage-metering and multi-tenant authentication layer for customer accounts.
- ◆ Build real-time monitoring dashboards and alerting for platform health and customer resources.
- ◆ Own API design, security architecture and reliability practices for an enterprise-grade environment.
- ◆ Partner with infrastructure, product and support teams to launch and scale the platform.

STACK Python · FastAPI · Vue.js · OpenStack · REST API · Cloud Infrastructure · Docker

Senior Software Engineer & Team Lead

JUL 2025 — DEC 2025

ZK IT Solution · Dhaka

Agricultural technology solutions for a Japanese client.

- ◆ Led the engineering team building AWD (Alternate Wetting and Drying) monitoring tools covering field conditions, water levels and farmer activities.
- ◆ Built backend and frontend modules for agricultural data collection — records, comments, images and GPS data.
- ◆ Delivered dashboards for field tracking, water-level analysis and progress reporting to Japanese stakeholders.
- ◆ Worked directly with Japanese consultants, agronomists and field officers to turn AWD requirements into system features.
- ◆ Designed simple, user-friendly interfaces for field surveyors and farmers with low technical background.
- ◆ Owned code reviews, task planning and technical decisions for the team.

CORE SKILLS

LANGUAGES & FRAMEWORKS

- Python
- Django
- FastAPI
- Vue.js
- JavaScript
- HTML5
- CSS

APIS & INTEGRATION

- REST API
- GraphQL
- Payment Gateways
- 3rd-Party APIs

CLOUD & INFRASTRUCTURE

- OpenStack
- Docker
- Cloud Infrastructure
- Monitoring & Alerting

LEADERSHIP & PRACTICE

- Team Leadership
- Code Review
- Sprint Planning
- Technical Docs

AVAILABILITY

- 🕒 Open to new opportunities — senior engineering and team-lead roles.
- ✉ Best reached by email or LinkedIn.

EDUCATION

B.Sc. in Electrical & Electronics Engineering
North South University, Dhaka
2012 — 2018

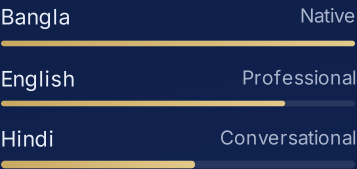

Higher Secondary Certificate
Govt. Sundarban Adarsha College, Khulna
2009 — 2011

Secondary School Certificate
St. Joseph's High School, Khulna

DOMAIN EXPERTISE

- FinTech & Payments
- Billing & Settlement
- KYC Onboarding
- Mobile Banking
- Cloud Platforms
- Multi-tenant SaaS
- AgriTech
- Field Monitoring

LANGUAGES

HOW I WORK

- ✓ Clean, well-documented architecture that other engineers can build on.
- ✓ Reliability first — monitoring, alerting and post-release support are part of the job.
- ✓ Comfortable working directly with clients, consultants and non-technical users.

EXPERIENCE — CONTINUED

Software Engineer NOV 2023 — JUN 2025

Fingerprint Information Technology · Dhaka
Payment platforms for financial-service clients.

- ◆ Developed, maintained and troubleshooted the company's legacy payment service, improving stability and reducing production issues.
- ◆ Designed and built a scalable payment gateway in Python using FastAPI.
- ◆ Integrated multiple third-party payment gateways and partner REST APIs.
- ◆ Handled end-to-end delivery from requirement analysis through deployment and post-release support.
- ◆ Wrote technical documentation and worked with QA and partner teams on integration testing.

STACK Python · FastAPI · Django · REST API · API Integration · Docker

Software Engineer JAN 2021 — OCT 2023

Circle FinTech Ltd · Dhaka
Mobile banking applications for banks and financial institutions in Bangladesh.

- ◆ Designed, built and maintained billing and settlement services for multiple MFS, bank and payment-gateway partners using Python and Django.
- ◆ Integrated third-party APIs (REST and GraphQL), including the OK Wallet integration with Jamuna Bank's JustPay service.
- ◆ Implemented a Global KYC (GKYC) onboarding system for the Jamuna Bank mobile app.
- ◆ Wrote reusable libraries and technical documentation to speed up delivery across the team.
- ◆ Containerised services with Docker and collaborated with product, QA and partner teams to ship production releases.

STACK Python · Django · REST API · GraphQL · JavaScript · HTML5 · CSS · Docker

Junior Software Engineer OCT 2019 — DEC 2020

Circle FinTech Ltd · Dhaka

- ◆ Developed and tested backend features for banking and payment applications using Python and Django.
- ◆ Built and maintained REST API integrations with partner banks and payment services.
- ◆ Supported the billing and settlement module, fixing bugs and improving reliability in production.
- ◆ Wrote clean, reusable code and documentation following team coding standards.
- ◆ Worked closely with senior engineers and QA to deliver releases on schedule.

STACK Python · Django · REST API · JavaScript · HTML5 · CSS
