Language

Experience

Sr. Software Engineer/ Team Lead

ZK IT Solution

07-2025 – Present

- Led a software engineering team developing AWD monitoring tools (field conditions, water levels, farmer activities).
- Built backend/frontend modules for agricultural data collection (records, comments, images, GPS).
- Integrated dashboards for field tracking, water-level analysis, and progress reporting for the Japanese team.
- Worked with Japanese consultants, agronomists, and field officers to translate AWD requirements into system features.
- Created user-friendly interfaces for field surveyors and farmers.
- Managed code reviews, task planning, and technical decisions as team lead.

Software Engineer

Fingerprint Information Technology

11-2023 – 07-2025

- Developed, implemented, and troubleshooted the legacy Payment Service.
- Integrated various APIs and 3rd-party payment gateways.
- Built scalable Python Payment gateway using FastAPI.

Software Engineer

Circle FinTech Ltd

01-2021 – 11-2023

- Developed, implemented, and troubleshooted billing and settlement services.
- Integrated multiple types of APIs.
- Built scalable Python applications using Django.
- Wrote documentation and updated/maintained all produced code.

Junior Software Engineer

Circle FinTech Ltd

10-2019 – 12-2020

- Integrated various APIs.
- Documented all code and performed updates/upgrades as needed.
